# REPLACE PROXY APPLIANCES WITH A ZERO TRUST SECURITY SERVICE EDGE

## A Complete Platform: ZTNA + Security Service Edge

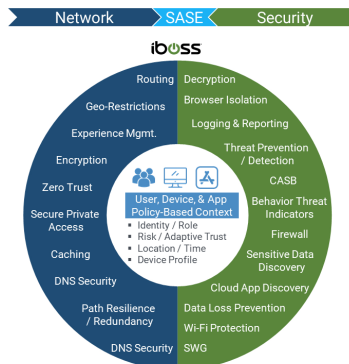

Providing both Connectivity and Advanced SaaS Security Services

### iboss SASE Benefits & Use Cases

- Significantly improves connectivity performance for all users, including remote workers
- Reduces complexity, cost & operational overhead related to managing network security infrastructure
- Enhances security with inspection of all content including files, data, and cloud application traffic
- Zero Trust enables connectivity directly and securely to all apps based on role
- Transparency for users / easy to use & deploy
- Increased effectiveness of network & security staff
- Reduces proxy and security appliance bloat
- Allows centralized security policies to protect all transactions and sensitive cloud data
- Eliminates costly proxy appliance mgmt. overhead

iboss Zero Trust Security Service Edge

### KEY BENEFITS:

Quickly replace legacy proxies to avoid high renewal costs

Automatically extend security and visibility to remote users

Consolidate point products such as VPN, Proxies, and VDI with ZTNA, SSE, and Browser Isolation for lower costs

Reduce management overhead from managing multiple security products with a single solution

Reduce significant CAPEX cash spending by moving to a per-user subscription model

## ABOUT IBOSS

iboss is a cloud security company that enables organizations to reduce cyber risk by delivering a Zero Trust Security Service Edge platform designed to protect resources and users in the modern distributed world. Applications, data and services have moved to the cloud and are located everywhere while users needing access to those resources are working from anywhere. The iboss platform replaces legacy VPN, Proxies and VDI with a consolidated service that improves security, increases the end user experience, consolidates technology and substantially reduces costs. Built on a containerized cloud architecture, iboss delivers security capabilities such as SWG, malware defense, Browser Isolation, CASB and Data Loss Prevention to protect all resources, via the cloud, instantaneously and at scale. The iboss platform includes ZTNA to replace legacy VPN, Security Service Edge to replace legacy Proxies and Browser Isolation to replace legacy VDI. This shifts the focus from protecting buildings to protecting people and resources wherever they are located. Leveraging a purpose-built cloud architecture backed by 230+ issued and pending patents and more than 100 points of presence globally, iboss processes over 150 billion transactions daily, blocking 4 billion threats per day. More than 4,000 global enterprises trust the iboss platform to support their modern workforces, including a large number of Fortune 50 companies. iboss was named one of the Top 25 Cybersecurity Companies by The Software Report, one of the 25 highest-rated Private Cloud Computing Companies to work for by Battery Ventures, and CRN's top 20 Coolest Cloud Security Companies of 2022.
